PROJECTS

Bike Rental System

JAN 2024 - FEB 2024

Project Description:

Developed a Bike Rental System to facilitate the rental process for users looking to rent bicycles for a specific duration. The system allows users to easily browse available bikes, choose rental plans, make payments, and track bike usage.

Technologies Used:

Front End: HTML, CSS, JAVA SRIPT

Back End: PHP, SQL

Responsibilities & Key Features:

- **User Registration and Login:** Implemented user authentication using JWT tokens, allowing users to sign up, log in, and manage their accounts securely.
- **Bike Catalog:** Designed a dynamic user interface to display available bikes with details such as type, price, and availability.
- **Booking System:** Developed a booking system to allow users to reserve bikes for specific times. This feature also includes checking for availability and managing rental durations.
